SCHEDULE OF POINTS FOR DIVISION 2— EFFECTIVE MAY 16, 2018

Division 2 is comprised of: Delaware, New Jersey, New York, Pennsylvania.

The Points towards a Championship shall be awarded to the Winners Dog and Bitch of each breed or variety based on the actual number of dogs or bitches competing in that breed or variety.

If the dog designated Winners Dog or Winners Bitch is also awarded Best of Breed or Variety, the dogs of *both* sexes that have been entered for Best of Breed or Variety competition and that have been defeated in such competition, shall be counted in addition to the dogs that competed in the regular classes for its sex in calculating championship points.

If the dog designated Winners Dog or Winners Bitch is also awarded Best of Opposite Sex to Best of Breed or Variety, the dogs of *its own sex* that have been entered for Best of Breed or Variety competition that have been defeated in competition for Best of Opposite Sex, shall be counted in addition to the dogs that competed in the regular classes for its sex in calculating championship points.

After points have been computed for Winners Dog and Winners Bitch subject to the above two stipulations, the dog awarded the Best of Winners shall be credited with the number of points calculated for Winners Dog or Winners Bitch, whichever is greater.

In counting the number of eligible dogs in competition, a dog that is disqualified, or that is dismissed, excused or ordered from the ring by the judge, or from which all awards are withheld, shall not be included. Any dog which shall have won fifteen points shall become a Champion of Record, if six or more of said points shall have been won at two shows with a rating of three or more championship points each and under two different judges, and some one or more of the balance of said points shall have been won under some other judge or judges than the two judges referred to above.

Highest Scoring Triple Score	Red & Blue Rosette

Official Standard for the Curly-Coated Retriever

General Appearance: This smartly upstanding, multi-purpose hunting retriever is recognized by most canine historians as one of the oldest of the retrieving breeds. Developed in England, the Curly was long a favorite of English gamekeepers. Prized for innate field ability, courage and indomitable perseverance, a correctly built and tempered Curly will work as long as there is work to be done, retrieving both fur and feather in the heaviest of cover and the iciest of waters. To work all day a Curly must be balanced and sound, strong and robust, and quick and agile. Outline, carriage and attitude all combine for a grace and elegance somewhat uncommon among the other retriever breeds, providing the unique, upstanding quality desired in the breed. In outline, the Curly is moderately angulated front and rear and, when comparing height to length, gives the impression of being higher on leg than the other retriever breeds. In carriage, the Curly is an erect, alert, self-confident dog. In motion, all parts blend into a smooth, powerful, harmonious symmetry. The coat, a hallmark of the breed, is of great importance for all Curlies, whether companion, hunting or show dogs. The perfect coat is a dense mass of small, tight, distinct, crisp curls. The Curly is wickedly smart and highly trainable and, as such, is cherished as much for his role as loyal companion at home as he is in the field.

Size, Proportion, Substance: Ideal *height* at withers: dogs, 25 to 27 inches; bitches, 23 to 25 inches. A clearly superior Curly falling outside of this range should not be penalized because of size. The body *proportions* are slightly off square, meaning that the dog is slightly longer from prosternum to buttocks as he is from withers to ground. The Curly is both sturdy and elegant. The degree of *substance* is sufficient to ensure strength and endurance without sacrificing grace. Bone and substance are neither spindly nor massive and should be in proportion with weight and height and balanced throughout.

Head: The *head* is a longer-than-wide wedge, readily distinguishable from that of all other retriever breeds, and of a size in balance with the body. Length of foreface is equal, or nearly equal, to length of backskull and, when viewed in profile, the planes are parallel. The stop is shallow and sloping. At the point of joining, the width of foreface may be slightly less than the width of the backskull but blending of the two should be smooth. The head has a nearly straight, continuous taper to the nose and is clean cut, not coarse, blocky or cheeky. **Expression-** Intelligent and alert. **Eyes-** Almond-shaped, rather large but not too prominent. Black or brown in black dogs and brown or amber in liver dogs. Harsh yellow eyes and loose haws are undesirable. **Ears-** Rather small, set on a line slightly above the corner of the eye, and lying close to the head. Backskull-Flat or nearly flat. Foreface-**Muzzle** is wedge-shaped with no hint of snipiness. The taper ends mildly, neither acutely pointed nor bluntly squared-off but rather slightly rounding at the bottom. Mouth is level and never wry. Jaws are long and strong. A scissors *bite* is preferred. Teeth set straight and even. The lips are tight and clean, not pendulous. The nose is fully pigmented; black on black dogs, brown on liver dogs. Nostrils are large.

Neck, Topline, Body: **Neck-** Strong and slightly arched, of medium length, free from throatiness and flowing freely into moderately laid-back shoulders. **Backline-** The back, that portion of the

body from the rear point of the withers to the beginning of the loin, is strong and level. The loin, that part of the body extending from the end of the rib cage to the start of the pelvis, is short and muscular. The croup, that portion of the body from the start of the pelvis to the tail set-on, is only slightly sloping. **Body-** Chest is decidedly deep and not too wide, oval in cross-section, with brisket reaching elbow. While the impression of the chest should be of depth not width, the chest is not pinched or narrow. The ribs are well-sprung, neither barrel-shaped nor slab-sided, and extend well back into a deep, powerful loin with a moderate tuck-up of flank. **Tail-** Carried straight or fairly straight, never docked, and reaching approximately to the hock. Never curled over the back and should not be kinked or crooked. Covered with curls and, if trimmed, tapering toward the point.

Forequarters: Shoulder blades are very long, well covered with muscle, and are moderately laid back at about a 55 degree angle. The width between shoulder blades is adequate to allow enough flexibility to easily retrieve game. Upper arm bones are about equal in length with shoulder blades and laid back at approximately the same angle as the blades, meaning the forelegs are set under the withers. The equal length of shoulder blade and upper arm bone and the balanced angulation between the two allows for good extension of the front legs. The forelegs are straight with strong, true pasterns. Feet are round and compact, with well-arched toes and thick pads. Front dewclaws are generally removed.

Hindquarters: Strong and in balance with front angulation. Thighs are powerful with muscling carrying well down into the second thigh. Stifle is of moderate bend. The hocks are strong and true, turning neither in nor out, with hock joint well let down. Rear dewclaws are generally removed.

Coat: The coat is a distinguishing characteristic and quite different from that of any other breed. The body coat is a thick mass of small, tight, crisp curls, lying close to the skin, resilient, water resistant, and of sufficient density to provide protection against weather, water and punishing cover. Curls also extend up the entire neck to the occiput, down the thigh and back leg to at least the hock, and over the entire tail. Elsewhere, the coat is short, smooth and straight, including on the forehead, face, front of forelegs, and feet. A patch of uncurled hair behind the withers or bald patches anywhere on the body, including bald strips down the back of the legs or a triangular bald patch on the throat, should be severely penalized. A looser, more open curl is acceptable on the ears. Sparse, silky, fuzzy or very harsh, dry or brittle hair is a fault. Trimming-Feathering may be trimmed from the ears, belly, backs of forelegs, thighs, pasterns, hocks, and feet. On the tail, feathering should be removed. Short trimming of the coat on the ear is permitted but shearing of the body coat is undesirable.

Color: Black or liver. Either color is correct. A prominent white patch is undesirable but a few white hairs are allowable in an otherwise good dog.

Gait: The dual function of the Curly as both waterfowl retriever and upland game hunter demands a dog who moves with strength and power yet is quick and agile. The ground-covering stride is a well-coordinated melding of grace and power, neither mincing nor lumbering. The

seemingly effortless trot is efficient and balanced front to rear. When viewed from the side, the reach in front and rear is free-flowing, not stilted or hackneyed. When viewed from the front or rear, movement is true: the front legs turn neither in nor out and the rear legs do not cross. Well-developed, muscular thighs and strong hocks do their full share of work, contributing to rear thrust and drive. The extension in front is strong and smooth and in balance with rear action. Balance in structure translates to balance in movement and is of great importance to ensure soundness and endurance; extremes of angulation and gait are not desirable.

Temperament: Self-confident, steadfast and proud, this active, intelligent dog is a charming and gentle family companion and a determined, durable hunter. The Curly is alert, biddable and responsive to family and friends, whether at home or in the field. Of independent nature and discerning intelligence, a Curly sometimes appears aloof or self-willed, and, as such, is often less demonstrative, particularly toward strangers, than the other retriever breeds. The Curly's independence and poise should not be confused with shyness or a lack of willingness to please. In the show ring, a correctly-tempered Curly will steadily stand his ground, submit easily to examination, and might or might not wag his tail when doing so. In the field, the Curly is eager, persistent and inherently courageous. At home, he is calm and affectionate. Shyness is a fault and any dog who shies away from show ring examination should be penalized. Minor allowances can be made for puppies who misbehave in the show ring due to overexuberance or lack of training or experience.

Approved October 12, 1993
Effective November 30, 1993

RETRIEVERS (CURLY-COATED)

SWEEPSTAKES

Judge: Ms. Dawn Buttion

Puppy Sweepstakes is open to all Curly-Coated Retrievers who are six months of age and under eighteen months of age on the day of the show.
